THE FINDING

EPICS: network trust is not a software fix.

CVE-2026-114595

EPICS Base 7.0.10 and earlier

WHAT TO CHECK

Three checks. Before you close it.

01 Who can connect?

02 What was deployed?

03 Is the fixed build running?

THE FAILURE PATH / SCHEMATIC

A malformed message can crash the service.

Message supplies a count

↓

Too little memory reserved

↓

Write outside that memory

Research result: memory corruption + crash.
Code execution was not demonstrated.

TAKE IT TO ONE SERVICE

Who can reach your EPICS service?

Name who owns access.

Verify the running fix.

Test the clients.

Response notes + worksheet
